PORTABLE NITROGEN FILLING STATION WITH AUTO INFLATOR

Many automotive shops together with motorcycle and ATV dealerships desire a portable self contained portable Nitrogen Tire Filling station to retrofit vehicles on their shop floor.

Ecco Technologies is pleased to offer two "Turn Key" systems capable of meeting this requirement effortlessly with the addition of the Nexus line of Nitrogen generators.

Available in 150 SCFH and 420 SCFH models all units share the following attributes.

Key Product Features

- Turn Key operation - simply connect to the shop air supply and go.
- Modern 21st Century design incorporating low maintenance cost PSA technology
- Capable of charging four tires at once
- New improved internal valves and fittings
- Strengthened base plates and bigger 90mm castors
- Rugged and reliable design
- N2 purity check point
- Internal tanks meet CE standards
- Easy to operate and quick installation
- Digital tank contents gauge
- Five year warrantee

Key Product Benefits

- Revenue generation for Tire Service Providers
- Cost effective to use, virtually zero maintenance
- Simple to set up
- Low life time costs - with high grade filtration and high performance components
- Guaranteed tank pressure accuracy and robustness
- Models available for every inflation application - automobiles, motorcycles and ATVs.

NEXUS NITROGEN GENERATORS
