Specifications:

All Bench Tanks are painted, one colour, White Alkyd Enamel. Some custom colours are available on request. Bench tank packages that include an air pump include a 60" air connect hose with a quick coupler. Hose reels are mounted on the left side of the tank as you face the front of the tank. Equipped tanks are shipped assembled with the exception of the meter. The meter is shipped in a box that is shrink wrapped to the bench top to prevent damage in shipping. The customer must install the meter on site.
