

MITSURESET OBDII TPMS TOOL

- ▶ COMPATIBLE WITH ALL TPMS TRIGGER TOOLS
- ▶ CAPABLE OF TRIGGERING MITSUBISHI SENSORS
- ▶ ONE TOUCH TPMS RE-LEARN MODULE

With the introduction of the MitsuReset tool, tire shops now have a low-cost, simple solution for performing TPMS relearns on Mitsubishi vehicles without the need for a scan tool.

ATEQ's standalone MitsuReset allows you freedom to use any other TPMS trigger tools like the ATEQ VT55 diagnostic tool, the ATEQ VT30 or VT15 trigger tools.

OPERATION FOR THE MITSURESET

1. Connect MitsuReset tool to the OBDII connector of the vehicle. Turn ignition on.
2. Press the MitsuReset "ON" button.
3. Use TPMS diagnostic tool to trigger TPM sensors.
4. After triggering all TPMS sensors on the vehicle, the green light on MitsuReset tool will turn solid green indicating successful loading of the new TPMS ID's. Turn ignition off and disconnect the device from the vehicle. The TPMS light in instrument cluster will turn off.
5. At times, vehicle may require additional driving when reset is completed.
